Agriculture & Trade Committee**

HB 2726

Brief Description: Creating Washington manufacturing services in statute.

Sponsors: Representatives Chase, Skinner, Kessler, Haler, Kilmer, Grant, Chandler, Blake, Clements, Linville, Newhouse, McCoy, Kristiansen, Kenney and Wallace.

Brief Summary of Bill

- Codifies the Washington Manufacturing Services (WMS).
- Directs the Department of Community, Trade, and Economic Development to contract with WMS to develop and implement training and consulting services to assist small manufacturing firms, with an emphasis on firms with less than 100 employees.

Hearing Date: 1/24/06

Staff: Tracey Taylor (786-7196).

Background:

Manufacturing is a major employer in Washington, employing 300,000 residents and accounting for 13 percent of all employment in the state. The manufacturing sector contributes \$26.6 billion to the state's gross state product. However, manufacturing in Washington is on the decline, losing more than 44,600 jobs between June 2000 and June 2003. With increased competition from overseas manufacturers as well as manufacturers located in other states, Washington's manufacturers are facing economic challenges.

Washington Manufacturing Services (WMS) is a not-for-profit organization with the mission of "fostering economic prosperity in the state of Washington by helping Washington's smaller manufacturers take action to increase their competitiveness (in a socially acceptable and environmentally responsible manner)." Affiliated with the National Institute of Standards and Technology Manufacturing Extension Program, WMS can link manufacturers with local experts and national resources. Although WMS is headquartered in Mukilteo, Washington, it maintains field offices throughout the state.

After a free pre-project visit by a WMS project manager, WMS will develop with the manufacturer a plan of action. WMS offers a variety of services, including lean manufacturing,

industrial marketing and quality, safety, energy conservation, e-Business, software selection, workforce training and product development. WMS does charge fees for the services.

Summary of Bill:

The Legislature intends to increase the state's support for delivery of modernization services to small and midsize manufacturers as well as leverage federal and private resources.

WMS is organized as a private, nonprofit corporation in accordance with chapter 24.03 RCW, with the mission of operating a modernization extension system, coordinating a network of private and public modernization resources, and stimulating the competitiveness of small and midsize manufacturers in Washington.

WMS will be governed by a board of directors. A majority of the board will be representatives of small and medium-sized manufacturing firms, and industry associations, networks or consortia. In addition, the board shall have at least one representative of a labor union or labor council. Ex-officio board members include the Director of the Department of Community, Trade, and Economic Development (DCTED), the Executive Director of the State Board for Community and Technical Colleges, and the Director of the Workforce Training and Education Coordinating Board (or their designees).

WMS must develop policies, plans, and programs to assist in the modernization of businesses in the targeted sectors of Washington's economy and coordinate the delivery of the modernization services. WMS must provide information about the advantages of modernization to economic development officials, state colleges and universities, and private providers. WMS must collaborate with the Washington Quality Initiative in the development of manufacturing quality standards and quality certification programs. In addition, WMS must serve as an information clearinghouse and provide access for users to the federal Manufacturing Extension Partnership's national research and information system. WMS must also provide, directly or through partners, assistance to industry associations, networks or consortia that would be of value to their members' firms in such areas as advanced business management practices, product development, market research and workforce training.

WMS may charge fees for services and make and execute contracts or other legal instruments. WMS may also receive funds from federal, state or local governments, private businesses, foundations, or any other source.

As part of its targeted sector assistance program, the DCTED is directed to assist WMS in applying for federal and private grants. The DCTED must also contract with WMS to provide the delivery of education assistance and training services to industry associations, networks or consortia, as well as technical assistance and consulting services to individual manufacturing firms. The DCTED must require WMS to collect such information as is necessary to determine the effectiveness of its services.

The DCTED's contract with WMS to develop and implement an educational strategy for assisting small manufacturing firms, should emphasize assistance for firms with 120 employees or less. The educational assistance program may include a combination of seminars and training session that provide broad instruction to a large cross section of small manufacturing employers and a program that provides direct consulting services for individual firms.

Up to 30 percent of the funding provided by contract to WMS must be used to provide individualized consulting services to firms with 100 or fewer employees. Such firms participating in the individualized training program may be required to provide up to 50 percent of the costs of the consulting services.

Appropriation: The sum of \$400,000.

Fiscal Note: Available.

Effective Date: The bill takes effect 90 days after adjournment of session in which bill is passed.
